

## Identify Your Stress Level

Many symptoms of excess stress are easy to self-diagnose. To help determine how much stress you experience on a daily basis, answer the following questions.

Yes	No
___	___ 1. Are you easily startled or irritated?
___	___ 2. Are you increasingly forgetful?
___	___ 3. Do you have trouble falling or staying sleep?
___	___ 4. Do you continually worry about events in your future?
___	___ 5. Do you feel as if you are constantly under pressure to produce?
___	___ 6. Do you frequently use tobacco, alcohol, or other drugs to help you relax?
___	___ 7. Do you often feel as if you have less energy than you need to finish the day?
___	___ 8. Do you have recurrent stomachaches or headaches?
___	___ 9. Is it difficult for you to find satisfaction in simple life pleasures?
___	___ 10. Are you often disappointed in yourself and others?
___	___ 11. Are you overly concerned with being liked or accepted by others?
___	___ 12. Have you lost interest in intimacy or sex?
___	___ 13. Are you concerned that you do not have enough money?

Experiencing some of the stress-related symptoms or answering “yes” to a few questions is normal. However, if you experience a large number of stress symptoms or you answered “yes” to a majority of the questions, you are likely experiencing a high level of stress. Take time out to develop effective stress-management techniques.
